Front-end React Developer Challenge.

(Please do not spend more than 2 DAYS on the solution)

The brief:

Please implement the provided Figma design. Refer to the supplied Figma link below.

Use the typography link and key assets supplied via Figma and API to complete your solution.

Requirements:

- Code a single page with responsive layout approach.
- Use any preferred compiler to build & run your site.
- **Case studies** should be implemented as a slider and retrieved via API.
- **Endpoint URL:** https://zm6zxgq6hyhe3smi5krzsrk2fu0iidhh.lambda-url.us-east-1.on.aws

You will be assessed on the following:

1. Technical approach
2. Coding standards
3. Data integration
4. HTML & SASS or CSS structure.

The solution code can be put in a repo of your choice and a link shared with us.

Please ensure the **Readme** has clear instructions on how to get the project running.

Document your thought process and decisions, as well as any other documentation you feel is relevant.

Links & Design:

Design: Link to Figma

Typography: Inter Fonts

You can use edit mode to access any assets from supplied designs. Click on the KJ Front-end Test dropdown located at the center of the Figma menu.

Please contact us if you have questions.

Good Luck
